EDUCATION

Northeastern University, Boston, MA

May 2028

Bachelor of Science in Computer Science and Media Arts (Game Minor + Math Minor)

Honors: Dean's List (Fall 2024 / Fall 2025), GPA: 3.6 /4.0

Relevant Courses: Algorithms and Data, Object-Oriented Design, Introduction to Databases, Principles of Human-Computer Interaction, Graduate Web Development, Virtual Environment, Animation 1

TECHNICAL SKILLS

Languages: Java, Kotlin, XML, C#, Python, TypeScript, CSS, HTML, and SQL

Frameworks: Streamlit, Flask, React, Node.js

Tools: Git Bash, GitHub Desktop

PROJECT EXPERIENCE

Developer, Personal Website, Tech. Stack: Node.js, React, TypeScript, CSS, HTML

January 2025 - Present

- Developing a personal website using Node.js and React in VS Code as a platform to showcase projects and technical skills.
- Learning and applying modern web development practices, including responsive design and component-based architecture.
- Using the fundamentals of web design with Figma prototyping and translating that into HTML and CSS.

Developer, Tic Tac Toe AI, Tech. Stack: C#

August 2025

- Designed and implemented a Tic Tac Toe game in C# as an exploratory project into other languages.
- Developed three AI difficulty levels by implementing varying levels of board state analysis.
- Applied decision-making algorithms to simulate intelligent gameplay and enhance challenge for the player.
- Gained hands-on experience with C# syntax, debugging, and testing in a practical project.

Co-developer, Communication App, Tech. Stack: MySQL, Flask, Streamlit, Git Bash

March 2025 - May 2025

- Collaborated with a three-member team to develop an app enabling communication between professors, TAs, students, and administrators. Designed and implemented a MySQL database to store and manage dynamic user data.
- Built a Flask REST API to facilitate secure and efficient data retrieval and updates.
- Developed the front end using Streamlit, creating an interactive and user-friendly interface.

WORK EXPERIENCE

Programmer & Game Animator, Ecton Empire, Boston, MA

September 2025 - Present

- Created a 20 minute demo for a narrative driven auto-battler, which was presented at Boston Festival of Indie Games.
- Peer programmed player movement, Collisions, Interactions, and UI integrations in the Unity Game engine.
- Animated pixel art movement and idle animations for character sprites.

Scheduling Coordinator, Tabletop Roleplaying Club, Boston, MA

September 2025 - Present

- Oversaw scheduling and communications for weekly meetings, optimizing attendance and ensuring seamless event execution.
- Partnered with other student organizations to plan and coordinate cross-club events and game nights.
- Founded club social media with aims to include new students who wanted more avenues of club to member communication.

Programmer, Robotics Club, Scranton, PA

September 2022 - June 2024

- Competed in two FIRST Robotics Competition seasons as part of an 11-member student-led team, contributing to both software and hardware integration.
- Programmed in Java, transitioning the drivetrain from Tank Drive to Swerve Drive and optimizing performance for competitions.
- Collaborated with engineers to integrate software with hardware and troubleshoot technical issues.
- Mentored three underclassmen on the codebase, robot mechanics, and programming strategies.
- Promoted to Lead Programmer, overseeing a five-member software team and managing code development, debugging, and continuous improvements.

Assistant Researcher, Polygence, Remote

October 2023 - March 2024

- Collaborated with a PhD candidate to support an independent research project that examined the impact of AI on the job landscape, analyzing historical technological shifts to inform projections.
- Synthesized data and insights to evaluate potential benefits and trade-offs of AI adoption, supporting evidence-based conclusions for the study.
